DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 1-6, 14-20 and 22-30, drawn to a hierarchy of command lists for editing a computer generated object of an image, classified in class 345, subclass 723.
- II. Claims 7-13 and 21 drawn to reading position information for computer generated objects and a camera from memory and editing the object through setup windows, classified in class 345, subclass 719.

The inventions are distinct, each from the other because of the following reasons:

Inventions of displaying command lists for corresponding CG objects and editing CG objects with respect to camera information are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions and effects. Group I specifically discusses the way in which editing commands are presented to the user for a predetermined Computer generated object. Meanwhile, Group II discusses editing according to positional information of the objects and the camera(s)' position and orientation.
